**The Samoset Resort Golf Course** is proud to announce the completion of their brand-new 18<sup>th</sup> hole and practice facility. The new 18<sup>th</sup> hole is an impressive 474-yard par-four featuring ten sand traps, three newly constructed ponds and a 11,500 square foot putting green.

In addition, the driving range has been renovated to be more challenging for individuals looking to test their hitting power. The now full length driving range is open to the public and features 5 target greens, green tees, and is available to both woods and irons. Also, located on the right side of the range, are six short targets that allow each player to work on their short game.

Listed as the "7<sup>th</sup> Most Beautiful Course in America" by Golf Digest, and ranked No. 52 on Golf Digest's "75 Most Upscale Golf Courses in America" list, The Samoset Resort Golf Course winds through seaside vistas, woods and gardens, offering some of the most magnificent views and formidable holes in golf. The Samoset Golf Course is an 18-hole championship course that is as challenging as it is beautiful.

The Samoset also offers programs and schools for each of the three phases of the game...Mind...Body and Swing in our Target Zone Golf Program. It includes year round training programs available for interested golfers specifically designed for each person. In this program, we teach each person to develop "their" swing. This means we take what each person brings to the game and then develop a swing around that. This allows the swing to be efficient and consistent.
